Solar electricity for slate roofs

Solarcentury's C21e Slate delivers an excellent performance per m² and is compatible with a wide range of natural and artificial slates, providing a perfect complement to a traditional slate roof.

No extra planning: C21e slates sit flush with standard roofing slates, to provide a traditional finish. Protecting your home from the elements and producing power for your home.

Ease of installation: Fitted to standard wooden battens using traditional roofing practice, with one solar slate covering the width of several conventional slates.

No specialist skills:
Designed to be installed by slaters, as part of the roof build.

Fast to fit: Faster to fit than traditional slate, with all of the electrical work carried out within the building.
